

EVENING VENDOR DEMOS

TUESDAY, JULY 27, 2010; 5:15–6:15 p.m.

Legacy Family Tree—2254 CONF

Legacy and New FamilySearch: Learn about the latest Legacy tools to work with FamilySearch.

RootsMagic—2258 CONF

“What's New in RootsMagic 4?”

An introduction to RootsMagic 4, the newest version of this award-winning genealogy software. Learn about features like web search, shared events (witnesses), person and place mapping, "Evidence Explained" based SourceWizard, New FamilySearch support, color coding, and much more. Plus learn how to run RootsMagic directly from your flash drive using RootsMagic To-Go.

Ohana Software—2260 CONF

“FamilyInsight –Essential Tools for the Genealogist”

Synchronize your file with new FamilySearch, easily standardize place names and use the FamilyInsight Separate tool to easily separate incorrectly combined records on new FamilySearch and more. FamilyInsight works with both Windows and Mac computers and files from PAF5 , Family Tree Maker 2010, Ancestral Quest , and other family history programs.

Generation Maps—Room 2265 CONF

“Free and Easy Genealogy Charts from New FamilySearch with FamilyChArtist”

Inspire your family and honor your heritage by getting your family's history off the computer and out where you can share it. Using this new free online tool, you can easily create beautiful charts using a gedcom or other online genealogy databases such as New FamilySearch. Come learn all the tips and tricks of adding additional people and correcting information, adding pictures and playing with the 1000s of graphics options. Print free scrapbooking pages, or submit larger size posters for printing. Come see how easy it is for first time users to create beautiful charts in just a few minutes without the purchase, installation or advanced training of other design software programs, or the juggling of different file formats.

LifeStory Productions—2295 CONF

“Heritage Collector Family History Software”

Learn new ways to organize and share photos. Create slide shows, calendars and story book pages. Use GPS to create and share cemetery maps, and much more. Questions are welcome!

WEDNESDAY, JULY 28, 2010; 5:15–6:15 p.m.

Legacy Family Tree—2254 CONF

Overview of Legacy Family Tree: See how Legacy helps write sources correctly and easily, Evidence Explained style, and learn how to create shareable CDs, migration maps, customized wall charts, publish book, get automated research suggestions and much more.

RootsMagic—2258 CONF

“Making New FamilySearch Easy with RootsMagic 4”

Learn how RootsMagic bridges the gap between your personal family history data and the New FamilySearch internet site. See how easy it is to import your PAF data and share that data between your own file and New FamilySearch. RootsMagic is the first software certified to reserve and request LDS temple ordinances. Learn how to find, reserve, and track needed or completed ordinances directly from RootsMagic.

EVENING VENDOR DEMOS

Incline Software—2260 CONF

“New FamilySearch Simplified with Ancestral Quest”

Learn how to keep New FamilySearch in sync with your PAF (or AQ) data using Ancestral Quest, the program from which PAF was derived.

Hi-Lite.org—2295 CONF

Hi-Lite.org is the patented online research community that helps you remember and organize the information that you and your friends find of value on the internet. Hi-Lite.org brings the highlighter pen into the online and digital age. Using the concept of an internet based highlighter pen provides the ease of use of a paper based highlighter combined with the powerful search and social networking aspects of the internet. Imagine a highlighter pen that never gets misplaced, is fully searchable, and sharable with friends and peers around the world, and never runs out of ink. The advantages of Hi-Lite.org are immense and new uses are being discovered each day.

There will be demonstrations of Hi-Lite.org using Internet Explorer and FireFox browsers. Additionally, there will be sneak previews of Hi-Lite.org for the iPhone and Android phones as well as new applications by n4mativ.

THURSDAY, JULY 29, 2010; 5:15–6:15 p.m.

Footnote—2254 CONF

“All Things Footnote.com”

Learn about one of the most valuable and exciting online genealogy resources. A live demo will cover the unique record collections on Footnote.com, how to search the over 66 million documents and how to use the Footnote tools to bring your family history to life.

Genealogy Registry—2258 CONF

“Solving All The World's (genealogy) Problems: A Strategic Overview of Genealogy Processes; The Clash (or Combination?) of Two Concepts: Genealogy Registry and New Family Search

Compiling research 2,000 times faster through cooperation

Using the inherent "mathematics of genealogy" in new ways, the Genealogy Registry system (a patented computer process) makes it possible to do genealogy research up to 2,000 times faster through "industrial strength" cooperation. These vast productivity improvements can quickly supply the new research desired by individuals and by the LDS Church. Everyone should understand this revolutionary concept as an exciting alternative to current methods. See www.GenReg.com (in beta test) for more information and to begin your participation.

Incline Software—2260 CONF

“Features in AQ Beyond PAF 5”

PAF 5 was derived from an earlier version of AQ, so the basics are roughly the same in both programs. Learn about the new features in AQ which are not in PAF. (New FamilySearch features are discussed in a separate class.)

Olson Data Max—2295 CONF

Overview of the M-writer and M-disc: Demonstration of the latest technology in permanent digital data storage. See how your critical information can be permanently archived using the high energy laser M-writer and preserved and stored on the M-disc.
